

Community Digital Inclusion Pilot

Officer instructions

Please prepare the six Community Digital Inclusion Pilot applications for our internal review meeting. Check administrative completeness and consistency against the programme rules, record evidence and prepare clarification drafts where necessary. Do not make funding decisions. Keep recent correspondence in view so we do not chase an applicant who has already replied.

Community Digital Inclusion Pilot

Programme guide. Funding decisions require a separate review. All amounts are SGD.
The reference date is 22 September 2026.

Purpose

Support proposed small community digital-literacy projects. This review covers administrative completeness and consistency, not eligibility approval, funding calculation or vendor selection.

Six review checks

1. Application form, project proposal and supplier quotation are present and readable.
2. Application ID agrees across documents; an ambiguous or missing identifier requires clarification.
3. Full quoted cost matches the form. Quotation line items must add to the quoted total. Compare like-for-like tax treatment; unspecified GST makes the comparison unresolved.
4. Project start and end dates agree across the form and proposal, and end is not before start.
5. The application declaration is signed. An empty signature field is incomplete.
6. Quotation validity covers the application received date. The validity term is in each quotation.

Status definitions

Ready for review: all six checks supported. Needs clarification: a concrete omission or contradiction. Unable to determine: evidence is unreadable or leaves interpretation unresolved. A status is not an approval decision. Preserve each evidence filename and the applicable section.

Correspondence

A logged reply indicates new material needs review, not that the problem is solved. Do not send repeat requests within seven calendar days of the latest request. Use the supplied reference date when calculating intervals. All addresses end in example.invalid and are for local drafts only.

Writing style

Address the organisation politely. List precise missing items, explain the inconsistency with both values, and request confirmation. Do not promise approval, impose an invented deadline, or quote real grant eligibility thresholds.

Evidence register

Read applications-dossier.pdf with grant_applications.xlsx. The dossier retains the original register source references so you can match its sections to the attachment index. quotation-G003.png is an image copy of QT-G003, not an additional quotation or application.

Read the scanned figures and tax wording before comparing the image with the typed dossier and Excel register. Record any unreadable field; do not fill gaps from expectation.

Clarification email template

To: {{TEST_RECIPIENT_EMAIL}}

Subject: Application - {{APPLICATION_ID}} - clarification required

Dear {{APPLICANT_NAME}},

Thank you for submitting your Community Digital Inclusion Pilot application.

To complete our administrative review, please clarify:

{{NUMBERED_REQUESTS_WITH_DOCUMENT_REFERENCES}}

This request concerns completeness and consistency; it is not a funding decision.

Thank you,

Programme Team

Do not fill an unsupported value. Leave it for officer review. No messages are sent by the resource pack.

Singapore context

Keep supporting documents and financial comparisons auditable. MOF describes transparency, fair competition and value for money in public procurement; procurement policy is not a grant eligibility rule. Apply the six checks in this programme guide.

- MOF government procurement (<https://www.mof.gov.sg/policies/government-procurement/overview/>)
- checked 22 September 2026.
